

## Ingredients

Skincerity Nightly Breathable Barrier™ is a revolutionary healthcare product that was created to produce healthy (great-looking) skin.

1. First, it is a **safe, breathable masque** that holds in the skin's natural moisture and amplifies your personal favorite products (you don't need to change anything!).
2. Second, it delivers and maximizes three ingredients (the absorbed product).

The ultra-thin, breathable masque is not absorbed like creams or foams. Skincerity works like works like a Band-Aid® to protect, restore, and speed the skin healing process. The ingredients of the masque are:

- **Skin coating polymers** – these proprietary polymers create a thin, flexible Breathable Barrier®. This breathable masque works for hours and functions just like your skin.
- **Pharmaceutical grade acetone** – serves multiple activating functions
  - Flash dries off the skin in 2-3 seconds to turn the liquid into a dry, skin barrier masque
  - Flash dries off to create microscopic “skin healthy” breathing pores
  - Keeps bacteria out of the bottle and kills bacteria on the skin that can cause acne

The ingredients delivered to the skin for absorption are:

:

- **Vitamin E** – a powerful antioxidant that augments your favorite products. This antioxidant is also helpful for users that use Skincerity alone.
- **Vitis Vinifera** - (grape seed oil) a powerful antioxidant that repairs damaged and stressed tissues, possessing regenerative and restructuring qualities which allow a better control of skin moisturization. Vitis Vinifera contains proanthocyanidins, which are very helpful in diminishing the sun's damaging effects, lessening free radical damage, and in wound healing.
- **Your natural moisture** – The breathable masque makes your own natural moisture the key ingredient. It actually turns your moisture into an active agent that intensely restores and rejuvenates damaged, unhealthy skin.

Skincerity Nightly Breathable Barrier is engineered **so you do not need to change your nightly regimen.** Continue to use your favorite products...just roll Skincerity on last - it makes them work faster and better.

Skincerity's technology and ingredients are “skin healthy”...it works like a second skin. Skincerity was developed from National Institutes of Health grants and used and tested in prestigious US medical schools and leading dermatology practices for more than 6 years to ensure maximum performance and product safety. It has been proven **safe for all skin types, does not dry skin, and does not clog pores.**
